

Love the place you live

Three steps to smart home protection

From first flat to family home is generally quite a journey. One that involves plenty of hard work – even sacrifices – on the way. It’s a long-term investment in every sense. And one that takes on whole new meaning once kids come along.

It means protecting your home is one of the most important things you’ll ever do.

So, the good news is that **Eaton’s SecureConnect™** range of smart intruder alarm products makes the process as easy as 1-2-3.

Just ask your Eaton-approved installer to help you choose the right product combination of SecureConnect™ products to match your family’s needs.

1. Select a wall-mounted **control panel**
2. Add optional **devices**
3. Tap the **Eaton SecureConnect™** app to set/unset your alarm and devices, receive trigger alerts, view images – and more.

Powering Business Worldwide

Sound advice from fully-trained installers

If your family time has a habit of being busy, your fully-trained, Eaton-approved installer is the specialist you need to make sure your system works perfectly in the background – while you and yours enjoy being together.

With new technology constantly coming on stream, your installer is also best placed to help you make the most of the smart home management revolution into the future.

Glass break detector

SecureConnect™

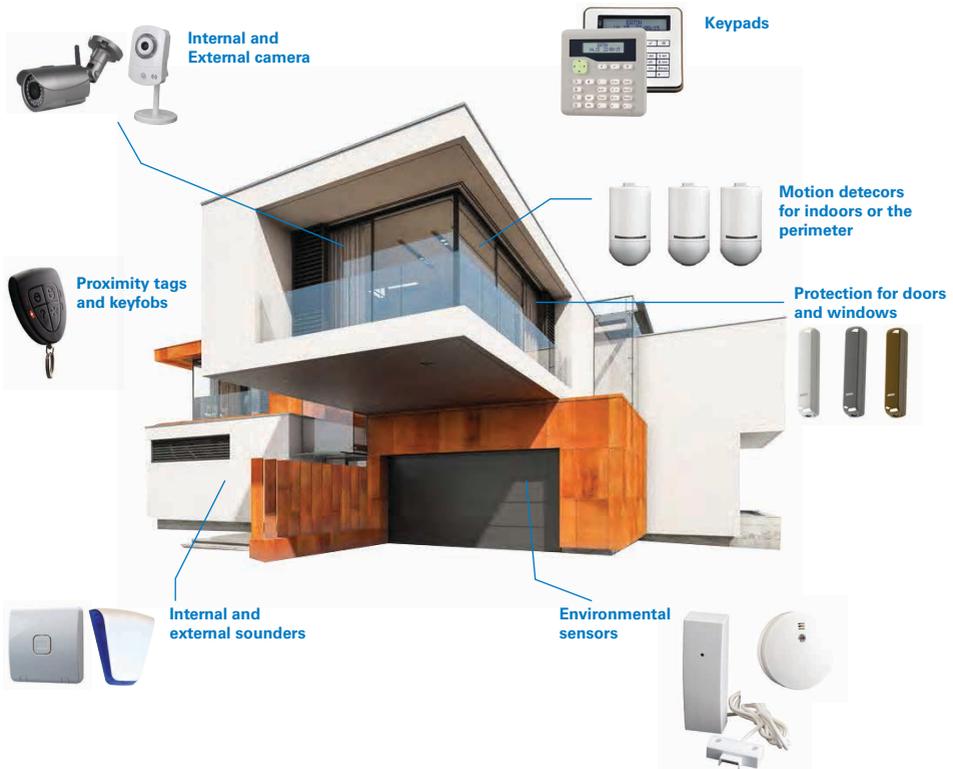

Putting a lock on cyber security

The Internet has revolutionised how we communicate through connected devices. But it's also made it vital those devices can talk to each other securely to prevent unauthorised access or control.

That's why when you choose Eaton SecureConnect™, you have the peace of mind of knowing you're protected with the same world-class security and encryption standards used by leading financial institutions. In fact, it's the only alarm system on the market built with cyber security in mind from the ground up.
